

Dear students,

The School of Computer Science for Business Management has published the booklet with indicative multiple-choice questions for preparation of the BA Degree Exam, JULY 2022 session, BA study program Computer Science for Economics.

We remind you that, starting with the current academic year, the BA Degree Exam returns to the standard version, with two distinct tests:

1. Test 1 - written: 45 multiple-choice questions
2. Test 2 - oral: defence of the bachelor's thesis prepared by the graduate

In order to pass the BA Degree Exam, the minimum grade required for each test is 5 (five), with the average of the two tests being a minimum of 6 (six). At the same time, in order to support your activity for preparing for the exam, the School of Computer Science for Business Management will organize a simulation for Test 1 of the exam, during the last week (S14) of the current semester.

Participation in the simulation is not mandatory but is **STRONGLY RECOMMENDED**, in order for the student to obtain an overview of his/her level of preparation at that time.

The booklet is available in electronic format, on the online platform used in the teaching activities - Microsoft Teams, inside the *team* dedicated to the final year of studies.

We wish you the best of luck!
