**Masterclass
on Legal Sustainability
during the Fourth Industrial Revolution (4IR)**

JUNE 2021

Masterclass Agenda

Circular economy and Sustainability under the legal lens

Edoardo Marcenaro
Raffaella De Rose
Paola Infantino
Enel

Green energy for sustainable development

Miruna Suci
Partner
SuciPopa

Artificial Intelligence (AI) for sustainable technology

Alina Dumitrascu
Enel

The shift to sustainable and smart mobility

Alex Neagu
Enel

New trends in international arbitration in light of sustainability principle

Luminita Popa
Partner SuciPopa
Lucretia Albanese Enel

Special Guest: Prof. Benedetta Sirgiovanni - The School of Law at Tor Vergata University of Rome

1. Circular economy and Sustainability under the legal lens

- ▶ The role of sustainability in inhouse counselling: the sustainable contract.
- ▶ Long terms contracts and Covid-19.
- ▶ A general introduction on circular economy: from EU Directives to local legislations (if any).
- ▶ The role of inhouse counsel in dealing and developing circular economy.
- ▶ Conclusions and Q&A.

2. Green energy for sustainable development

- ▶ Need to shift from fossil fuels to emissions-friendly, sustainable power to achieve net-zero carbon emissions
- ▶ Green energy produced from renewable sources (solar, wind and energy-storage projects)
- ▶ Energy transition and the development of new technology solutions such as hydrogen
- ▶ Acceleration of the energy transition by incentivising new infrastructure and technology
- ▶ Challenges in energy transition. Legal tools to overcome them
- ▶ Conclusions and Q&A.

3. Artificial Intelligence (AI) for sustainable technology

- ▶ AI definition and characteristics.
- ▶ Regulating AI.
- ▶ Excellence and Trust on AI.
- ▶ AI as a tool to accelerate transition to a circular economy and to achieve the Sustainable Development Goals (SDGs)
- ▶ AI in use-cases and in court cases
- ▶ Conclusions and Q&A.

4.

4. The shift to sustainable and smart mobility

- ▶ Why go electric?
- ▶ Public and private charging solutions
- ▶ Contractual relationship with the customer – keep it simple rule
- ▶ Protection of software used in charging solutions through blockchain
- ▶ Conclusions and Q&A.

5. New trends in international arbitration in light of sustainability principle

- ▶ Greener arbitrations – reducing the significant carbon footprint.
- ▶ Arbitration and the use of IA.
- ▶ Data protection and cyber security – enhanced complexity to international disputes.
- ▶ Efficiency in arbitration and ADR in global projects – significant impact for a sustainable process.
- ▶ Conclusions and Q&A.
